Full-Stack Developer with 11 months of remote experience at a US company, building an AI-powered inventory platform with TypeScript, Node.js, PostgreSQL and React Native. Built and launched Orvexa, a real-time restaurant ordering SaaS, solo and in production with its first client. Now building a new product, with a growing focus on AI.

EDUCATION

Higher Institute of Technological Studies (ISET), Sidi Bouzid — 2024 – June 2027 (expected)
Licence appliquée (Applied Bachelor) in Information Technology – Multimedia & Web Development

Lycée 9 Avril 1938, Tunis
Baccalauréat in Technical Sciences, 2023

EXPERIENCE

360dmmc, Remote (Illinois, USA) — Dec 2025 – Present
Full-Stack Developer, FreshStockAI

- Built and refactored **40+ REST API endpoints** for inventory, purchase orders, dashboards, margin alerts and compliance (TypeScript, Node.js, PostgreSQL, Drizzle ORM); delivered **41 tasks in five months** in an Agile team.
- Built the camera, offline storage and frame-processing layer for **Flash Audit**, an AI camera stock-counting feature.
- Developed a token-authenticated WebSocket server for real-time alerts and an expiry watchdog service.
- Designed a compliance scoring endpoint (expiry, lot codes, FSMA 204 traceability) returning a letter grade.
- Wrote end-to-end tests for invoice OCR and Flash Audit; documented **103+ endpoints** in Postman.

Value, Tunisia — Jan 2026
Cybersecurity Intern

- Deployed Wazuh SIEM monitoring Windows, CentOS and Ubuntu machines; passed **4/4 checks**; 26-page report.

ATEJ – Tunisian Association for Childhood and Youth, Tunisia — Jan 2024
Web Developer Intern

- Built and launched the association's WordPress website (atej.tn) with a responsive Arabic layout; still live.

PROJECTS

Orvexa (GitHub) – *Real-time QR ordering SaaS for restaurants (solo)* — Dec 2025 – Mar 2026

- Built four connected apps (customer, kitchen, waiter, owner) in a TypeScript monorepo; QR ordering in 3 languages.
- Real-time API with Express, Socket.io, PostgreSQL and Redis; JWT auth, role-based access, Playwright tests.
- Deployed with Docker, nginx and nightly backups; launched with a **first restaurant client**.

AgriLink (GitHub) – *Mobile app for farmers, **hackathon 2nd place** (team)* — 2025

- React Native and Firebase app with AI plant-disease diagnosis from a photo (Plant.id API).

StayHub (GitHub) – *Booking app for unique stays (solo)* — 2025

- React Native app with a clustered price map, multi-step search and OAuth sign-in.

SKILLS

Languages & Backend: TypeScript, JavaScript, SQL, HTML, CSS, Node.js, Express, REST APIs, WebSockets
Frontend & Mobile: React, React Native, Expo, Vite
Databases: PostgreSQL, Drizzle ORM, Redis, Firebase Firestore, WatermelonDB
DevOps & Testing: Docker, nginx, Linux, Git, Vitest, Playwright, Postman, Wazuh SIEM
AI & Automation: AI API integration (image recognition, OCR), n8n workflow automation

CERTIFICATIONS

n8n Workflow Automation, Levels 1 & 2 | Introduction to AI, Centre Elife (pending) | INJAZ Innovation Camp

LANGUAGES

Arabic (native) | French (C1) | English (B2) | German (B1)
